PRASHANTH SHENI

prashanth20cm022@gmail.com - +91 8465823748

Professional Summary

Software Engineer with experience in application development through a current engineering role at Relanto Global and a technical apprenticeship at DBS Tech India. Skilled in Java, Spring Boot, REST APIs, microservices, Angular, React.js, and database technologies, with exposure to AWS, Docker, and CI/CD fundamentals. Strong foundation in object-oriented programming, application debugging, testing, database management, and Agile software development. Interested in building secure, reliable, and maintainable enterprise applications.

Professional Experience

Associate Software Engineer - Relanto Global March 2026 – Present

- Contribute to enterprise application development using Java, Spring Boot, Angular, React.js, and related technologies.
- Develop and integrate REST APIs to support communication between application components and backend services.
- Work with microservices-based application components and follow modular software design principles.
- Troubleshoot application issues, debug code, and support integration and functional testing.
- Work with AWS and Docker in application development and deployment workflows.
- Use Git for version control and collaborate with team members through Agile/Scrum development workflows.

Software Engineering Apprentice - DBS Tech India June 2025 – December 2025

- Completed technical apprenticeship training in enterprise application development using Java and Spring Boot.
- Learned backend development, REST API integration, and microservices architecture concepts.
- Gained exposure to Angular, React.js, JavaScript, and modern web application development.
- Learned AWS cloud fundamentals and Docker containerization concepts for application deployment.
- Practised application debugging, testing fundamentals, database operations, and code maintenance.
- Gained exposure to Git workflows, CI/CD fundamentals, and Agile/Scrum software development practices.

Projects

LifeLink – Organ Donation Platform *React.js, Node.js, Express.js, Neo4j*

- Designed a donor-recipient matching platform using graph database relationships and Neo4j.
- Developed RESTful backend APIs using Node.js and Express.js.
- Optimized database queries for datasets containing 1,000+ records and supported match response times under 10 seconds.
- Tested matching workflows with multiple scenarios and improved backend maintainability through modular design.

Vasavi Campus Mentorship Platform *React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack mentor-mentee management platform with authentication and role-based dashboards.
- Implemented backend APIs, database integration, and responsive application interfaces.
- Streamlined mentorship coordination workflows, reducing manual coordination effort by approximately 50%.

EduTrack Course Enrollment System *Java, MySQL*

- Developed a Java-based application for course enrollment with authentication and CRUD operations.
- Implemented database operations and used debugging and testing to improve application reliability.

Technical Skills

Languages: Java, JavaScript, SQL, Python, C
Backend: Spring Boot, Node.js, Express.js, REST APIs, Microservices
Frontend: Angular, React.js, HTML5, CSS3
Cloud & Containers: AWS, Docker
Databases: MySQL, MariaDB, MongoDB, Neo4j
Tools: Git, GitHub, Postman, CI/CD Fundamentals
Core CS: Object-Oriented Programming, DSA, DBMS, Operating Systems, Computer Networks
Practices: Debugging, Testing Fundamentals, Agile/Scrum, Problem Solving

Education

Vasavi College of Engineering – B.E. in Information Technology 2023 – 2026
CGPA: 8.60

Sanjay Gandhi Memorial Polytechnic – Diploma in Computer Engineering 2020 – 2023
CGPA: 9.15

Achievements & Activities

- Qualified Smart India Hackathon 2024, Secured third place at Srujana Tech Fest (state level).
- Active Toastmasters member, developing communication and leadership skills, Volunteered with StreetCause in team-based activities.
